

2PM

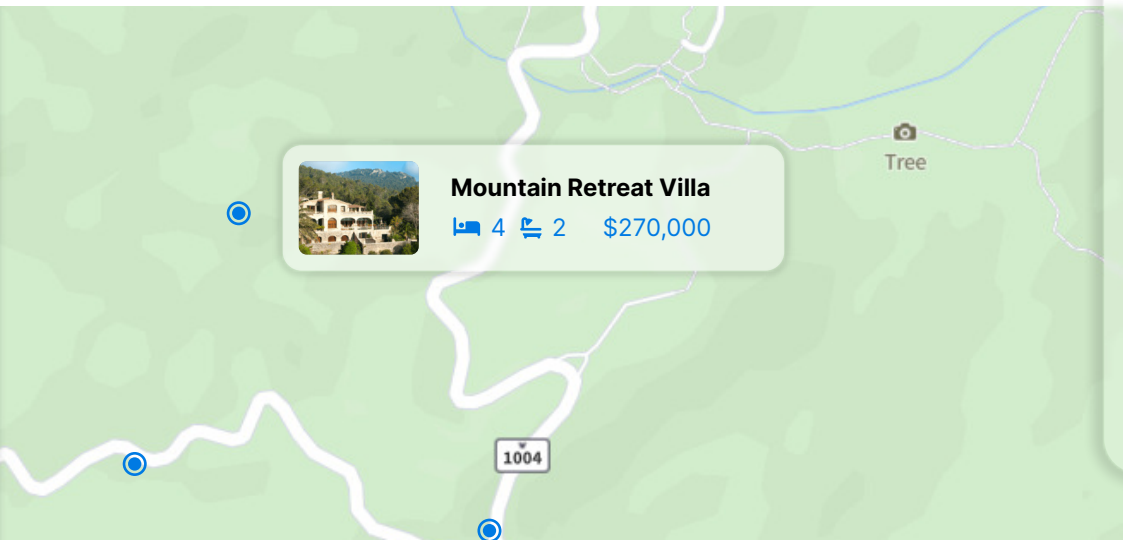

Context Specific AI Agents

2PM

Creates **context specific** agents that collaborate with users using natural language.

- ean View
- Balcony
- Garden
- Pet Friendly
- Jacuzzi
- Swimming Pool

Remi Listening EN

+ balcony
+ garden

LOCATION
↔ Bangkok → Chiang Mai

Sure! I've added the pet-friendly and swimming-pool filters and set the search location to Chiang Mai. There are 82 properties that match your criteria. Happy hunting! 😊

Ok great - what nice coffee shops are in this area?

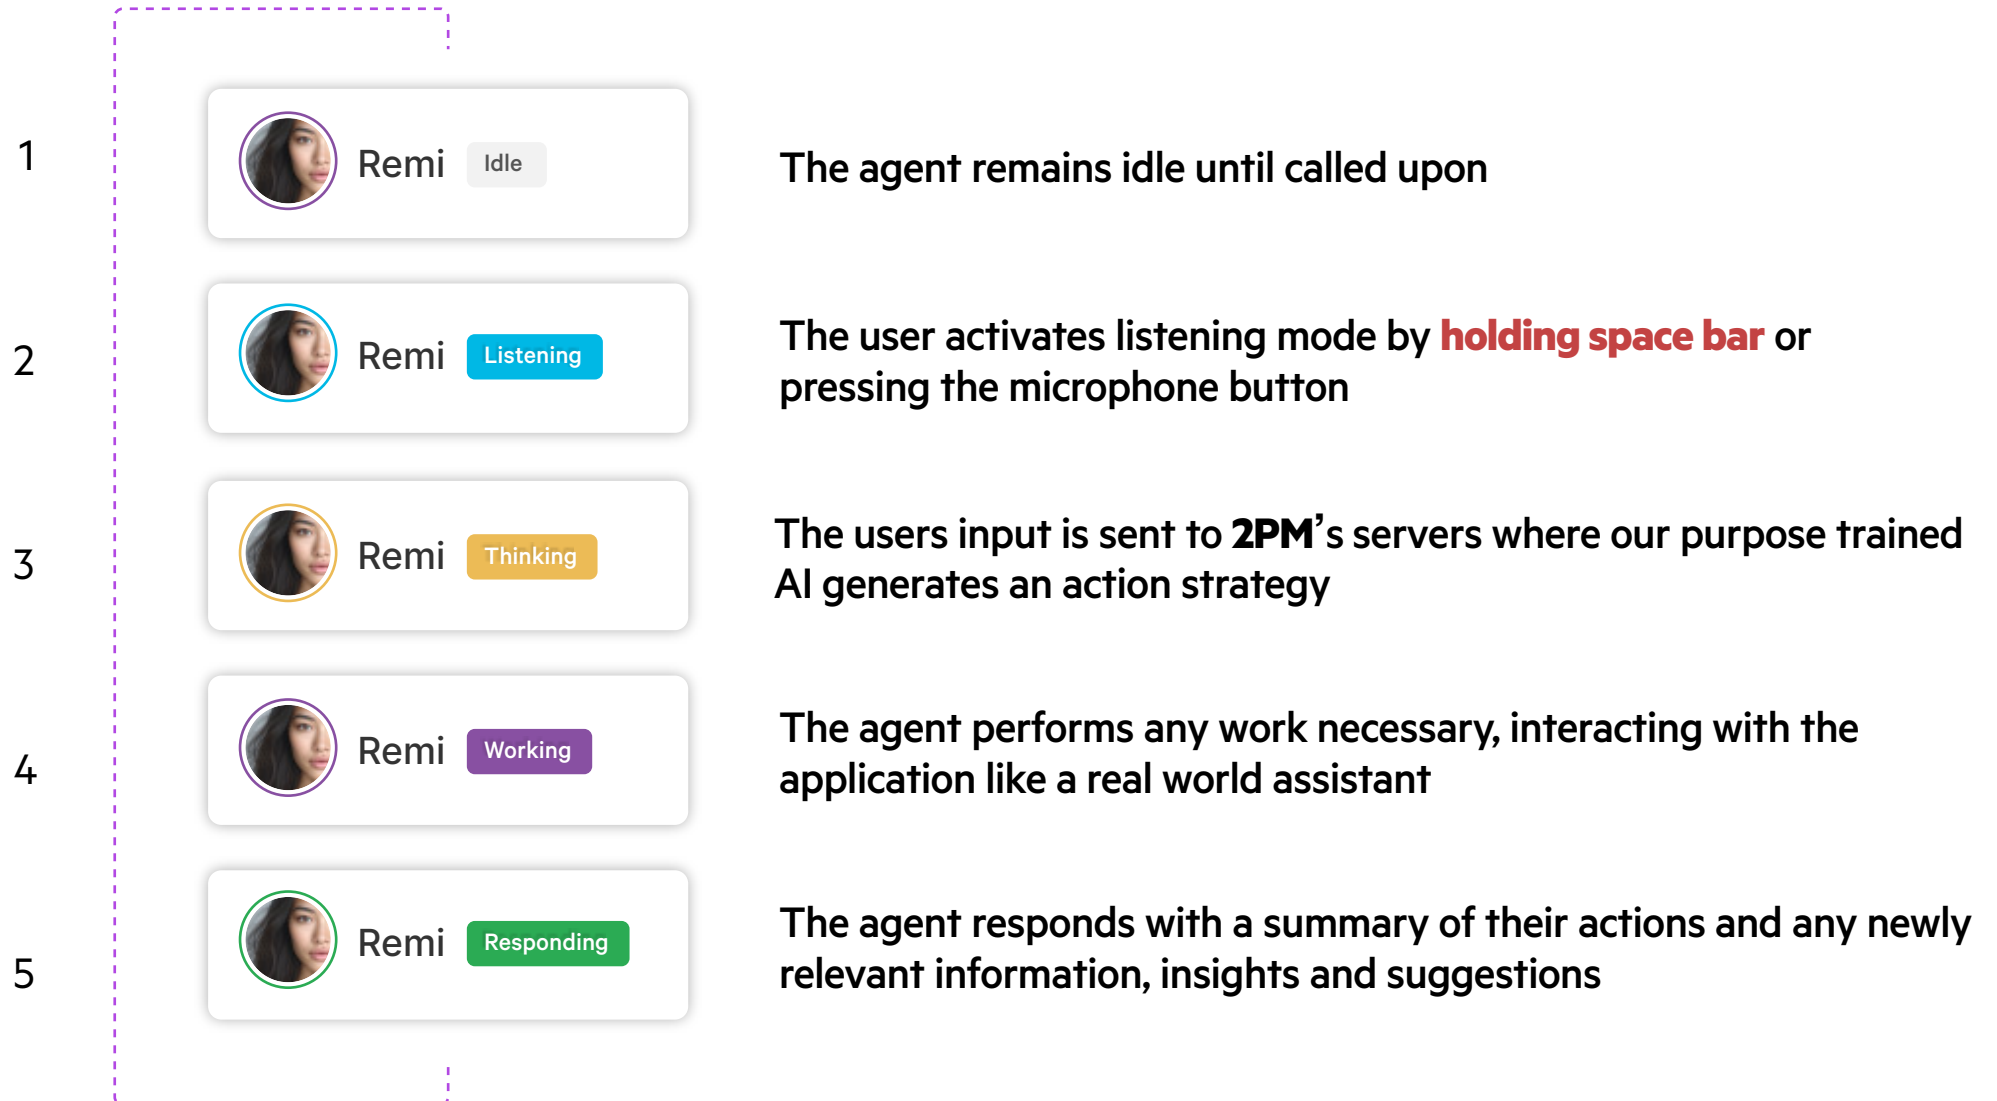

Nine One Coffee... Yelloo Graph One Nimman

Chiang Mai is known for its great coffee ☕. Here are a few well rated coffee shops in the area. Let me know if you need any more details!

Ok, can I book a viewing of the mountain villa? 🗣️

2PM's Intelligent Workflow

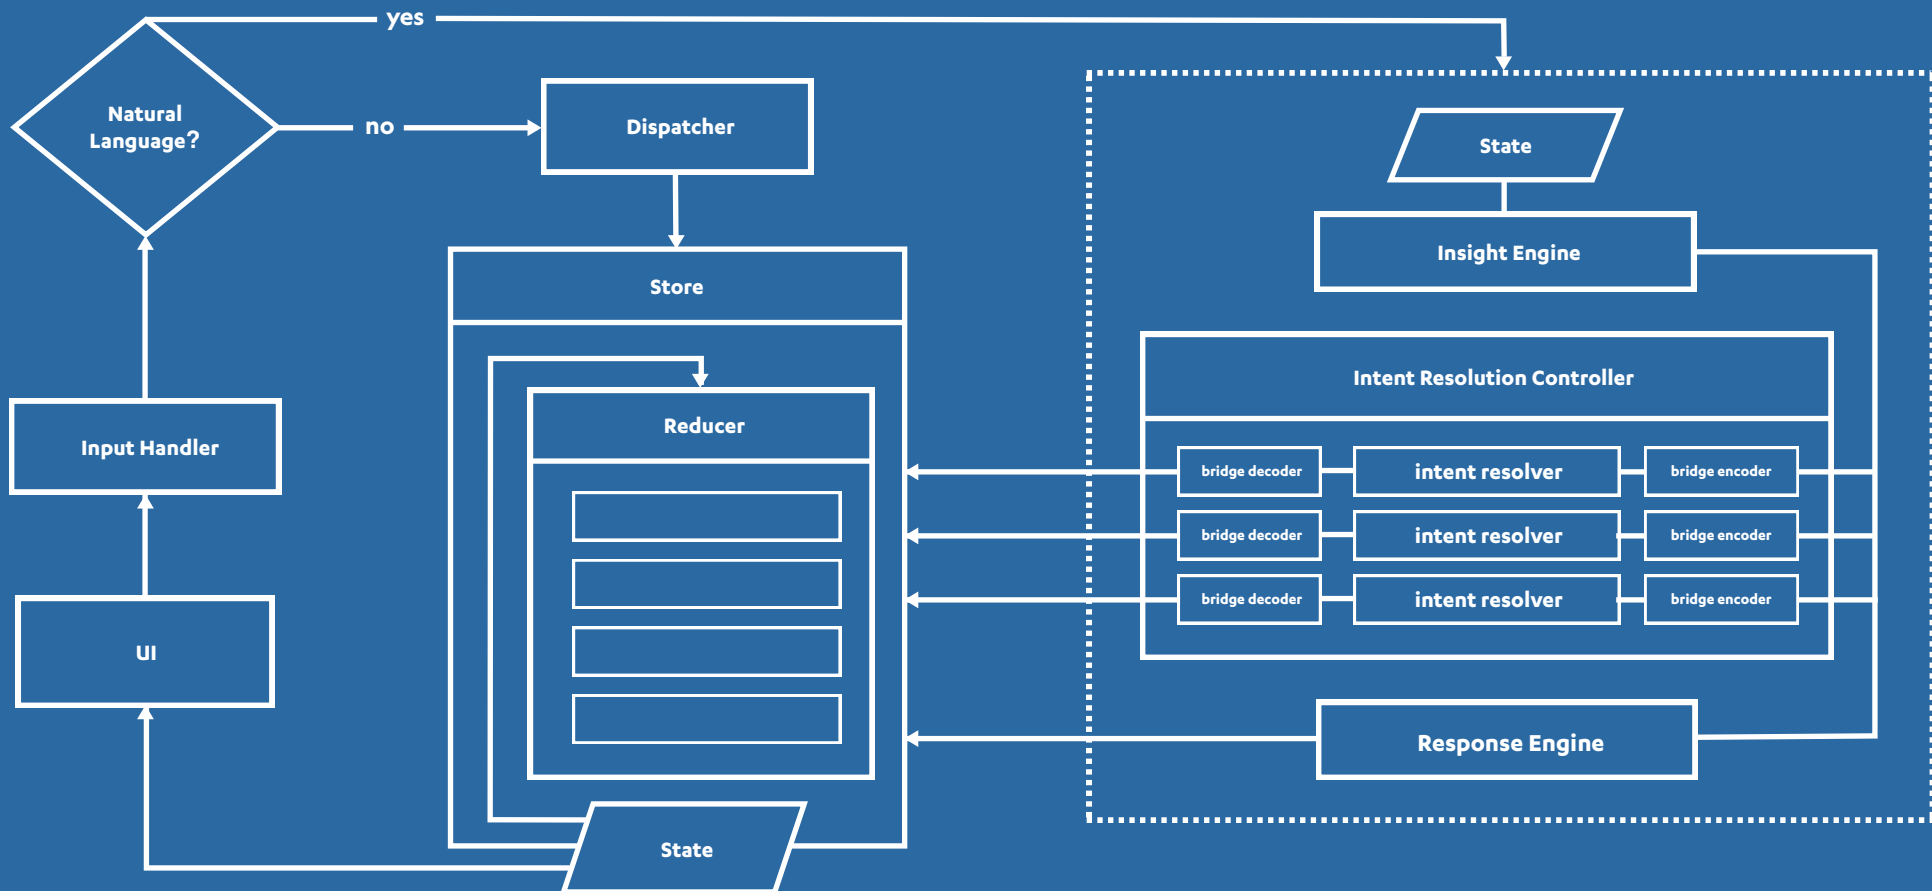

We are currently in a **paradigm shift**. Interacting with context aware AI agents using natural language requires an innovate approach

Solstice

A framework for human AI collaboration

* Solstice enables Jarvis from Iron Man like interactions with AI.

Emotion.. With Logic

People choose their products and services based on **emotion**, not logic.

We work with companies to develop relatable, engaging characters that fit with their brand. We create **memorable characters**, that people *want* to use.

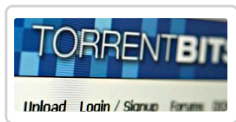

The image displays three chatbot interfaces, each with a unique character and background theme:

- Tess (Listening):** Background is a red sports car. Tess asks, "Let's see this in Red.. Can I upgrade the wheels?". The chatbot responds, "Red.. A great choice! This will certainly look great. We have some great options if you'd like to upgrade the wheels. I'll show you." It then presents three wheel options: "1. Low Gloss Alumi..", "2. Wide Spoke Alu..", and "3. Star". Tess asks, "Show me what it looks like with those first ones. How soon after I make payment can I have this delivered to me?".
- Remi (Working):** Background is a green map. Remi asks, "Hey Remi, Can you show me 3 bedroom condo Store in Bangkok". The chatbot provides filters: "Location: Chiang Mai → Near the Apple Store," and "Space Requirements: Min Bedrooms: 3". Remi asks, "Of course I can, let's find a great property for you. There are 265 properties that match this criteria within your budget in mind?". Remi then asks, "Thanks! That modern condo with the big balcony looks like a good fit. What's the commute time there?".
- Tiff (Responding):** Background is a close-up of jewelry. Tiff asks, "It's mine and my wife's anniversary coming up. Can you recommend me something to buy her?". The chatbot asks, "Hmm what kind of jewelry does she like?". Tiff responds, "I don't know.. Here's a few things she has already worn". The chatbot shows a diamond necklace and responds, "Ok, here's some recommendations based on what you've shown me".

The Founder

Jake Elder has been **obsessed** with user experience for over 20 years

1999 Working on open source file sharing projects, studying Computing and IT in university

Successful career working for digital agencies like **LBi**, **Razorfish**, **M&C Saatchi** and performing key work for big industry players like **Square Enix**.

2020 Lead UX for London based AI startup **Spirit AI**, playing a crucial role in selling our AI powered content moderation tool to Amazon in a 7 figure agreement.

2022 Game design and lead developer for blockchain based cryptocurrency project “**Degenz Game**”, launching an NFT collection on **Magic Eden** that generated **\$220,000**, selling out at launch despite a severe market downturn.

2PM

Blending experience with ambition, **2PM** is founded with the vision of uniting those that can see the great potential of **AI**, we plan to shape the future by using it's power.
